

MOBILE SALES SOLUTIONS

umdasch Retail Carts

Be where your customers are

In today's world, consumers want greater buying conveniences and quick service and they expect brands to meet them where they are. Our Travel Retail division is able to make all these possible through our Mobile Sales Solutions.

Especially useful in large airport environments, with customers on-the-move and in haste, retail carts are the perfect companion to brands looking to reach more customers, enhance their customer experience, and increase their sales.

We can build fully customized mobile carts, with the use of an electric vehicle base, to match your brand and chosen theme. The carts are fitted with the standard features you would find in stationary stores, such as POS terminal, display shelves and labels, and roller shutters.

Additional benefits include large compartment for the operator's comfort, eco-friendly engine, ergonomic design, and low maintenance costs.
